

***Outlook App for JIRA* now available for Office 365, iOS & Mac**

Germany, 02.05.2017: The German vendor yasoon GmbH releases a new version of its *Outlook App for JIRA* that runs on all Office 365 Outlook platforms: Outlook for Windows, Outlook for Mac, Outlook for iOS and Outlook Online.

Yasoon GmbH is a specialist in modern Outlook integrations and develops high-quality and secure Outlook Apps to meet the needs of its customers. The main product is the *Outlook App for JIRA* with over 400 active customers worldwide.

The *Outlook App for JIRA* helps employees to quickly transfer emails from customers or colleagues to Atlassian JIRA (Core, Software and Service Desk). New issues can be created and updated without leaving the Outlook inbox. This connection between Outlook and JIRA also allows users to display relevant issue information next to incoming emails.

This kind of Outlook integration can increase the user acceptance of Atlassian products. So far, the *Outlook App for JIRA* is only available for Windows users. "Our customers do not exclusively use JIRA for software development, but in other divisions like HR, Sales and Marketing as well. In this environment smartphones and tablets are on the rise." says Andreas Schmidt, managing director of yasoon GmbH.

Yasoon is launching a guided beta-phase for the new version of the *Outlook App for JIRA* available for Outlook Mac, iOS and Online. The beta starts on May 2nd, 2017, just in time for the Atlassian Summit in Barcelona. A version for Outlook for Android will follow as soon as Microsoft adds support.

An active Outlook 365 subscription or an Exchange Server 2016 is required to participate in the closed beta.

Registration is available at <https://beta.yasoon.com>

Company Profile

yasoon GmbH is a technology start-up based in the inspiring surroundings of Mafinex in Mannheim.
